

EXLATHENA — ENTERPRISE BRIEF

# ExlAthena Platform Overview — Supply Chain Brain

Knowledge-graph AI for global supply chain and manufacturing enterprises.

---

## Positioning

ExlAthena is the neural operating system for enterprise planning — synchronizing demand, inventory, predictive maintenance, fleet/ship signals, and explainable decisions on live ERP and MES.

## Capability pillars

- Supply chain & manufacturing planning
- Global ship & fleet tracking signals in the plan
- Physical AI on the shop floor
- Predictive maintenance linked to capacity
- Nine modules · one neural pipeline

## Industries

Manufacturing-first, with distribution/logistics and retail patterns on the same fabric.
